Holland High Tech

Global Challenges, Smart Solutions

WELCOME TO THE DUTCH INDUSTRIAL SUPPLY PAVILION AT THE HANNOVER MESSE IN HALL 4.

It is a pleasure to present you this booklet with an overview of 60 companies at the Dutch Industrial Supply collective. Brainport Industries, Holland Innovative, Koninklijke Metaalunie, Mikrocentrum and NEVAT have joined forces in organizing this Dutch Industrial Supply collective.

At an 850 sqm stand in Hall 4, the exhibitors - including systems suppliers, specialist suppliers, start-ups and network organizations - will present their expertise and capabilities as innovative development partners. The programme also includes in-depth technical presentations and discussion forums with suggested topics.

For an overview of the presentations and discussion forums see "Forum Smart Industry of the Netherlands" on the website of Hannover Messe.

A small map showing the location of the companies at the collective is included as well as listed key-words register.

You are very much welcome to visit our Dutch Industrial Supply Pavilion.

BRAINPORT INDUSTRIES

Your high tech open supply network

Brainport Industries is a cooperative of 90 tier-one, tier-two and tier-three suppliers in the high-tech supply chain active in high-mix, low-volume, high-complexity in the Netherlands (total turnover 2,0 billion euro with 9.000 fte) and active in more than 30 countries.

With specialists of various technical disciplines Brainport Industries offers an economically efficient and optimally organized supply network, reducing the time-to-market for the customer.

Brainport Industries provides a fertile ground and a solid structure for collaborative projects whether they are related to technology, markets or people and represents the interests of its members on political level.

The profiles of the participating companies can be found under 'Members' at www.brainportindustries.com

HOLLAND INNOVATIVE

Leadership in product and process development

New products need to be as reliable as possible, have the potential to be brought to the market quickly, and, above all, they need to meet the expectations and requirements of the customer. Holland Innovative is specialised in project management, product and process development and reliability engineering. Customers include leading multinationals, Small and Medium Enterprises (SMEs) and start-ups. They have a strong desire to do things differently – in a better way. Holland Innovative delivers excellence, experience, the power of implementation and, above all, flexible project managers and experts.

KONINKLIJKE METAALUNIE

Koninklijke Metaalunie is the largest Dutch employers' organisation for small and medium-sized enterprises active in the metal industry. The more than 13,000 affiliated members offer work to approximately 150,000 employees and jointly represent a turnover of more than 22 billion euros.

Metaalunie focuses its activities on companies active in the metal industry up to approximately 100 employees in different sectors such as machine and equipment construction, the manufacture of metals, measuring and control technology, electronics, engineering, welding and construction work, tools, casting, yacht building, machining, sheet-metal working, agricultural mechanisation, overhauls and maintenance and trade and service.

Koninklijke Metaalunie encourages and supports SME's to develop international strategies in order to strengthen their position in a world where international competition is increasing rapidly.

MIKROCENTRUM training • events • business

As an independent knowledge institution Mikrocentrum wants to contribute to the improvement of technical processes and business processes of companies which are active as OEM or supplier in technical manufacturing and/or the process industry.

Mikrocentrum realises this by organising events in which a combination of knowledge transfer and knowledge networking is the focal point.

Our most important activities are:

- the High Tech Platform: 600 member companies
- trade fairs: 10 per year such as the Precision Fair
- lecture days: 30 per year
- trainings: 150 course titles ranging from intermediate to academic levels

NEVAT

Network of Ambitious Suppliers

NEVAT is a branch association with 200 affiliated top suppliers (total turnover 2,5 billion euro) working for the high-tech, semicon, medical, automotive, agricultural and food industry. The members operate in different groups: System Developers, System Suppliers, Electronic Manufacturing Services (EMS), Sheet Metal, Precision Parts Suppliers and suppliers of Heavy Machining.

NEVAT is a vibrant association who organizes a lot of activities for their members regarding 4 main themes:

1. Sharing knowledge to achieve a higher level
2. Technology road mapping to be fit for the future
3. Benchmarking and helping members with strategic decisions
4. Providing advocacy input to the government for the benefit of industry policy.

The profiles of our member companies are clearly described in the international web portal at www.nevat.nl.

2E Cable Assembly is specialised in cable assembly. We develop, assemble and supply all types of special electrical cables: from prototypes and samples to series of several thousands. As a customer, you expect your cables to be made exactly as you want them, however specific or complex they are. We can do that like no other. Our organization has a particularly high level of knowledge, and qualified people with high-performance machines and tools are at work in our manufacturing department, providing a high level of service.

We don't just deliver 'a solution', but 'your solution'.

Accerion is a fast growing high-tech startup company developing a unique indoor and outdoor positioning system for autonomous vehicles and mobile robots. The patent-pending positioning system allows indoor and outdoor navigation without infrastructure. Accerion offers the positioning systems as components to automation and robotics manufacturers, and initially focuses on the logistics and manufacturing automation market. Accerion is founded in 2015, and the two founders have since secured a leading customer, a large investment and a development partner. Accerion is currently developing the positioning system and the market launch is planned for Q1 2017.

Simply more productivity BMO Automation creates more productivity in the machining industry by deploying running standard system solutions for CNC lathes and milling machines.

These systems can run 24 hours and as such produce a higher quantity of products. These systems can be compared to a robot that operates the machines and as such allows clients to save time and money.

In the past years, BMO Automation has turned its innovative drive into an extensive range of products, which has resulted in the Iridium, Platinum and Titanium series.

The Platinum24 has been awarded by the jury of the 'Technishow Innovatie Award' in The Netherlands with the status "Innovator" in March 2016.

We are a leading name in thermal and mechanical plastics processing. By means of thermoforming we are able to deliver a prototype within a minimum of 2 days and a maximum of 3 weeks. Our biggest machine can produce single-piece parts in sizes up to: 4000 x 2500 x 1000 mm. Our machine park includes three CNC milling machines, one 3-axis and two 5-axis machines. (one with a 6000x2600x1200 mm milling bed). We also do sawing, draping, bending, setting, gluing, and complete assembly of products. We work with exclusively recycling plastics and also assemble fiber-reinforced plastics, bio-plastics and/or green materials.

During the Hannover Messe 2015 Greijn Form Technics was awarded the Holland Innovation Award.

Pulseform applies electromagnetic pulse forming technology to connecting, deforming and moving industrial components. It is an existing technology that offers entirely new possibilities in this new context.

Joining components is an essential part of industrial production. The usual technologies for making joints are welding, soldering or gluing. Pulseform offers an alternative, electromagnetic pulse forming (EMPF) technology, that has many advantages, such as: strong joints via contactless method, joints between different materials possible, very suitable for weight reduction programs, no welding, soldering or using glue necessary and it fits into a cradle-to-cradle production process.

VDL Groep is an international industrial company focused on the development, production and sale of semi-finished products, buses & coaches and other finished products and the assembly of cars. Since its founding in 1953, VDL Groep has grown to include 87 operating companies, spread over 19 countries, with more than 11,000 employees and a turnover of 2.7 billion euros. The strength of VDL Groep lies in the mutual cooperation between the companies.

As high-tech subcontractor VDL is specialized in:

- Metal working
- Mechatronic system and system supply
- (Cleanroom) assembly
- Plastics processing
- Surface treatment
- Production automation

MARKETS:

- SEMICONDUCTOR
- AUTOMOTIVE
- CAR ASSEMBLY
- MECHATRONICS
- MACHINE & EQUIPMENT

COMPETENCES:

- CLEANROOM
- LASER CUTTING
- PRECISION PARTS
- STAMPING / PUNCHING
- WELDING

MATERIALS:

- ALUMINIUM
- FERRO METALS
- NON FERRO METALS
- STAINLESS STEEL
- TITANIUM

VENNE ELECTRONICS

Venne Electronics situated near Maastricht in The Netherlands.

We have been developing and producing state-of-the-art electronic products for 35 years now.

From the initial study through proof of concept, development, prototypes, 0 series, to serial production. Enthusiastic and realistic – like a one-stop shop, our team of highly motivated specialists are in constant touch with one another during every stage in the chain. This means you only need to keep in touch with a single contact. We take over responsibility for product and process development, logistics and procurement, production and assembly, servicing, and end-of-life management.

Hope to see you at the Trade fair.

Contact: Martijn Rutten

Vector Fabrics specializes in development tools for the complex software used in embedded systems. Nothing is more painful than losing your good reputation due to a software bug. Nothing worse than endlessly delaying a project to try to reproduce that one bug that seems to only trigger at the customer. We believe quality tools can make all the difference.

Pareon Verify gives a deep insight into how your large software stack actually behaves. Programmers can now ensure that concurrency and memory-access bugs are a thing of the past. Amaze your customers with reliable and safe software.

MARKETS:

- MEDICAL
- AEROSPACE
- ANALYTICAL INSTRUMENTS
- TELECOM
- ICT

COMPETENCES:

- SOFTWARE ENGINEERING
- SOFTWARE QUALITY
- SOFTWARE SECURITY
- DYNAMIC ANALYSIS

WBM STAALSERVICE CENTRUM

Stand: D41

Industrieweg 22

Contact: Pedro Tegelaers

WBM Staalservice Centrum bv is a supplier of parts and components in sheet metal from 2 up to 35 mm thickness in medium size series.

Our company has invested continuously, not only in machines and capacity but also in experience.

Our motto „we think steel’ drives our ambition and WBM Staalservice bv has a strong reputation as a co-maker and innovative problem solver, supporting its customers in the design and manufacturing of machines and equipment. Feasibility studies, prototyping, advice (on the choice of materials) as well as logistics are part of the services offered.

MARKETS:

- AGRICULTURE INDUSTRY
- ENERGY
- MACHINE & EQUIPMENT
- TRANSPORT SYSTEMS
- LIFTING GEAR

COMPETENCES:

- DRILLING
- LASER CUTTING
- LASER WELDING
- RE-ENGINEERING
- SMALL AND MEDIUM SERIES

MATERIALS:

- ALUMINIUM
- FERRO METALS
- STAINLESS STEEL
- STREX 700 MC
- HARDX 450/500
